## ALMA TREADLE FEEDER

riversystems.it

*The anti-waste feeder for chickens and hens, 100% Made in Italy*

ALMA is a treadle feeder with capacity of 19 or 30L, designed to **avoid any feed waste**.

In fact only when the bird steps on the treadle the tilting door opens giving access to the feed. Furthermore, thanks to the **anti-waste grid** inside the feeder, the animals cannot scoop out the feed to the ground. The knurled knobs allow to adjust the feed level in the trough as needed.

The treadle disposes of **15 possible weight regulation levels** to open the tilting door: from 0,23 to 2kg. The supporting feet avoid direct contact of the metal with the ground, thus preventing oxidation that would compromise the feeder life.

Two animals can eat at the same time.

Beside being anti-waste, this feeder prevents wild birds, mice or similar animals from eating the poultry feed and from carrying disease. Furthermore, the feed is shielded from the rain and humidity.

ALMA is partially pre-assembled; the assembly of the supplied components does not require any tools.

### TECHNICAL DATA

7201		7211
7,46 kg	Weight	9,21 kg
355x240x475 mm	Dimensions	355x240x635 mm
19 L	Capacity	30 L
13,5 kg	Feed in pellet	21,5 kg
8052015474767	Barcode	8052015474750

### Sloping roof

Designed to facilitate the downflow of water from its top and the outflow of condensation that may form inside.

riversystems.it

### Accessories in nylon

The lid blocking button is made of nylon for a longer life, as well as the tilt door and lid hinges.

riversystems.it

riversystems.it

### Feet

Plastic supporting feet to avoid the direct contact of the metal sheet with the ground, thus preventing oxidations that would compromise the feeder life

### Knurled knobs

Use them to adjust the height of the feed distribution shutter

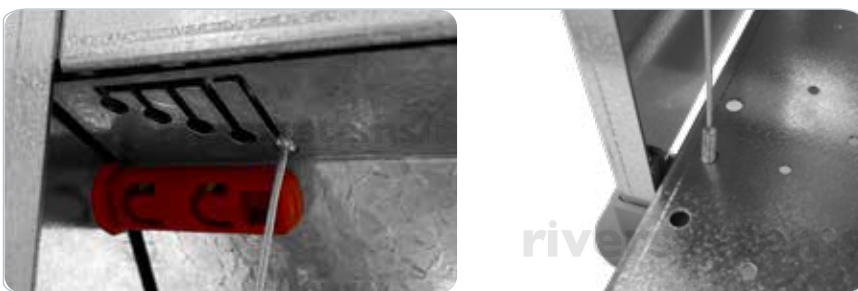

riversystems.it

### Anti-waste grid

Made of nylon, it prevents the birds from scooping out the feed

riversystems.it

### Adjusting hook and rounded anti-drip rim

The adjusting hook is used to set the weight needed to open the tilting door. Easy to assemble and adjust without the use of tools.

The rounded anti-drip rim prevents the bird from getting hurt while eating and the rain from wetting the food.

riversystems.it

### Treadle

Designed to easily remove dirt and to provide the chickens with a steady and comfortable support.

## TECHNICAL CHARACTERISTICS

- **Body** in galvanised sheet
- Nylon **hinges**
- Plastic **feet**
