15L SIPHON DRINKERS

ART.1415-05 / 1415P

SIPHON DRINKER IN PLASTIC with handle (and legs)

The extra-large drinker

Simple, reliable, the ideal drinker to provide always clean water to your poultry without difficulty.

It is composed of three parts. The **handle**, with ergonomic grip, is made of heavy-duty material. A loop in the handle allows the user to hang the drinker safely. The **dome** is equipped with 4 supports, designed to house the handle, that sustain and give stability during the filling phase. In addition, the bottom of the dome is provided with small wings that lock/slide into the tray. The **tray**, once positioned on the inverted siphon, must be turned in the direction indicated by the icons on its bottom. It is also provided with an opening that allows the water to pour out of the dome and fill the tray to its predetermined level.

PRODUCT DETAILS

Big and strong handle

Thanks to the ergonomic handle, the grip on the drinker is handy and comfortable. The loop enables the drinker hanging

Dome with supports

During the filling phase they ensure a perfect and stable base for the dome

Push-in legs

Tray with sockets to push in the 4 legs in order to lift the drinker from the ground. This guarantees cleaner water and facilitates the animals

High quality product

Tray, dome and handle are made of high quality plastic that guarantees a long lasting life

15L SIPHON DRINKERS

- Ensure an always clean water supply to animals
- They can be lifted from the ground thanks to the special 65mm high legs. When used with chicks, the tray is placed directly on the ground, while the legs become extremely useful for older animals as they allow to keep the water clean and ensure animals drink more properly

- a** Plastic tray with sockets for legs
- b** The rounded dome prevents any deposit of solid or liquid sediments and facilitates the cleaning
- c** Shape designed to optimize volumes when domes are piled (storage and shipping)
- d** The loop in the handle allows to hang the drinker
